A TROLLEY FOR ALL PURPOSES

Our new MECHANIC is just right for those who need a bit more space for storage in their workshop trolley. Along with six fully extendable telescopic drawers, the new version also has an additional storage compartment which can be locked (interior dimensions: 72 cm x 35.5 cm x 38 cm). Its adjustable shelf provides sufficient room for more workshop equipment. The extensive surface of the 30 mm thick wooden worktop ensures the machining of large, delicate workpieces on the workshop trolley itself. With square perforations on the side walls, allowing for accessories to be mounted.

BOYS WILL BE BOYS IN FOUR-WHEEL MATTERS

We put our whole heart into bolting work. This is particularly true in the automobile business. After all, whether it's new vehicle, a vintage car, a company car or the family saloon, the car is so much more than just a means of transportation. You cannot do without functioning brakes if you do not want to put a brake on the sheer joy of driving. The need is for a dependable brake piston re-setter to rapidly and safely reset brake pistons. This important basic part is also now in our range. The new 8-piece 1/2" socket set with open end is ideal for hugely simplifying work at difficult-to-access points, such as injection nozzles. Those who have had to tighten or loosen line screws in cramped spaces will be delighted with the 13-piece crow-foot socket set with its swivel handle and extender. The new adjustable universal drilling gauge set enables severed and ripped out studs – particularly at cylinder heads and exhaust flanges – to be rapidly and precisely bored without any cylinder head removal.

018
019

NEW

9798.2030 CYLINDER HEAD DRILL GAUGE SET

30 pieces

- > Considerable time saving – 2 - 4 hours – No need for cylinder head removal.
- > This adjustable universal drilling gauge enables severed and ripped out studs – particularly at cylinder heads and exhaust flanges - to be bored without any cylinder head removal (M8 and M10 bolt threads)
